T-H Marine Atlas® Hot Shot™ Hole Shot Plates

- This simple but revolutionary plate easily attaches to the bottom of our jack plate to provide an amazing 18 to 20 percent better hole shot. That's 2 to 3 seconds faster out of the hole.
- Hot Shot does this by dramatically reducing water drag on take off as well as serving as a center trim tab.
- An added advantage is the ability to stay on plane and virtually eliminating porpoising at lower speeds.
- Models to fit all Atlas Jack Plates (both standard and heavy duty jack plates).

Ski Boat / Tow Boat Replacement Actuators & Control Boxes Instructions for Determining Your Requirements

For many years, Lenco Marine has supplied actuators, control boxes and various wave-shaping tabs / surf tabs to the various OEMs serving the ski boat industry. Lenco continues to service the replacement market by offering replacement actuators and control boxes.

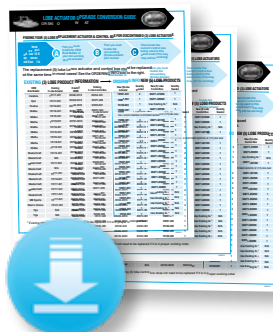

Information contained on the Lenco website helps you to:

- ▶ Identify your non-working ski / tow boat electric actuator and / or control box.
- ▶ Determine if your actuator is a 3 Lobe (old-style) or 5 Lobe (new-style) version.
- ▶ Determine the part number for your non-working 5 Lobe actuator
- ▶ Determine the part number(s) to replace your non-working 3 Lobe actuator (new control box may also be required).

Download the Instructions for Determining Your Requirements

Additional information may be found on www.lencomarine.com by clicking on the "Products" tab, then "Ski Boat Replacement Parts" tab and then following the instructions.

Still Need Help with Your Ski Boat / Tow Boat Replacement Parts?

Lenco Electric Actuators for Trim Tabs

Replacement Actuator Reference & Ordering Guide

Follow these simple steps to find your Replacement Actuator

A Find the code on face of the actuator below the Lenco label. The second digit from the left identifies the Actuator Type. Follow the arrow from step A on the chart below.

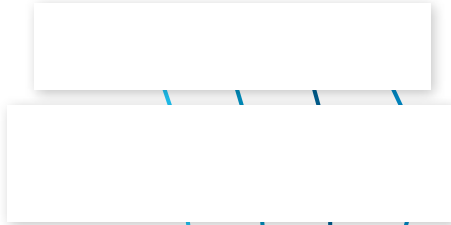

B The last digit to the far right of the code identifies the hole size(s) for mounting. Follow the arrow from step C on the chart below.

C The 3rd digit of the branding code indicates the month manufactured. See the chart at the bottom of the page.

D The 4th digit of the branding code indicates the year manufactured. See the chart at the bottom of the page.

The additional space is the only difference found between the old & new 5 digit code.

Centek Marine Vernalift™ Mufflers - Side In

- The Vernalift muffler was originally designed for small auxiliary propulsion engines installed near or below the water line in sailboats.
- In the early 70's the quieting capabilities of lift mufflers were recognized.
- The Vernalift family expanded to include new and larger engines.
- Application: Inboards, Sailboats and Generators.
- Fuel type: Gas/Diesel.
- Waterline: Above or below.
- Sound rating: Better.
