**Airhead Double Action Pump**

**AIRHEAD**

- Perfect for topping off towables.
- This double action pump inflates and deflates towables, kayaks, boats, airbeds and other inflatables.
- It delivers a continuous stream of air on both the up and down strokes.
- Simply turn the release valve counter-clockwise and you're pumping air only on the down-stroke.
- This is a great option when your inflatable is almost full and there's back pressure.
- Four universal valve fittings are included to fit Boston valves and stem valves.
- The accordion-style hose stretches to 5 ft. long and interlocks to the pump, so that it doesn't fall off while you're pumping.
- Volume is 2 liters/stroke.
- Very effective for topping off large towables in the boat, since peak pressure is an impressive 14 psi.

**Towable Inflation Guide**

First, it is important to know that tubes do not require high pressure; they are low pressure / high volume products. Most towable tubes can be inflated using one good electric pump or a combination of 12 volt and hand pumps. Some of the newer 12-volt inflators have been designed specifically to inflate beds or tubes, but will still not fully inflate some of the bigger tubes now on the market. (Most 12-volt compressors, while doing an excellent job of filling a bicycle or car tire, do not have the volume capacity to inflate many towables.) If you are filling your toys at the lake, some of the bigger tubes on the market require a hand pump in addition to the 12-volt inflator that plugs into your boat's cigarette lighter. The inflator will do most of the hard work, and the hand pump can be used to top off the tube and maintain proper inflation levels.

**Lillipad Diving Boards**

- The worlds only diving board specifically designed for mounting on a boat.
- Can be installed on nearly any boat 18 feet in length or larger with a solid, flat surface for installation.
- LilliPad Diving Boards are NOT a plank.
- Unlike a pool diving board, the diving platform itself does not flex. The spring action from the LilliPad comes from the urethane spring which is part of the framework of the diving board.
- Designed for use by children and adults up to a maximum weight of 250 pounds.
- Designed with heavy wall aluminum extrusions, stainless steel hardware and urethane spring components, corrosion and component failure is absolutely minimal.
- LilliPad Diving Boards offer traction materials and an adjustable stabilizer rail for safe jumping as well as a quick release pin to lower the diving board while it is not in use.
- Designed with a quick release pin which allows the board to drop down along the side of the boat while not in use. You can easily stow your LilliPad Diving Board by simply unscrewing the three eye bolts that secure it to the boat. The apparatus then separates into two sections (Ladder & Base/Board) which can easily be stowed.
