Moeller Swingarm Mechanical Sending Units

- With a direct site gauge or with the conversion capsule gathers fuel level information with the float.
- While accurate, the gauge will fluctuates as the fuel in the tank "slosh" around the tank when boating because of the moving parts - the float.
- Calibrated to 33 to 240 Ohms.

Moeller Swingarm Electrical Sending Units

- Swingarm Electric Sending Units gather fuel level information the same way as the mechanical sending units.
- It does, however, connect to a dash mounted gauge without a conversion capsule.
- Calibrated to 33 to 240 Ohms.
- They are also a DIY product, letting the consumer measure their tank depth and make the swingarm the correct length.
- Internal components will not rust or corrode.
- Float rotates easily in 90 degree increments for tanks wall and baffle clearance.

Attwood In-Line Fuel Demand Valve

- Made of high-strength composite material.
- Hose size: 5/16" - 3/8".
- Installs between the fuel tank and the primer bulb.
- Built-in manual override.
- Ensures that fuel is supplied to the engine only when demanded during start up or engine operation.
- Prevents engine flooding and fuel spillage due to pressurized fuel.
- Compatible with Ethanol blended fuels and all OEM brand engines.
- Operating input pressure: 138 kPa (20 psi), protected for 276 kPa (40 psi) pressure spike.

Perko Carbon Canisters

- Spring loaded volume compensator compresses carbon to reduce internal abrasion caused by vibrations. The heavy wall, elliptically shaped body and location of the volume compensator near the end of the canister permit higher pressures (up to 5 psi) during pressure testing, thus simplifying pressure test set up.
- Large surface area filters located at each end of the canister keep carbon in place and allow for the lowest airflow restrictions available.
- Patented "floating bracket" allows for easy installation while reducing the transmission of torque to the canister body, end caps and spuds.
- Polymer body to allow various size canisters with low tooling investment.
- End caps welded to extruded body.
- Width 3.8", height 2.9".

Marpac Fuel/Water Separating Marine Filter Kits - Racor® Inside

- Kits include: Universal Filter Head, (2) Aluminum Hose Barbs, (2) Aluminum Plugs, Thread Sealant - .20 fl. oz., Water Collecting Bowl and 10 Micron Water Separating Fuel Filter.
- Why Racor Filter Inside? Traditional filter media (paper) absorbs water. Marpac with Racor Filter Inside actually sheds water away from the filter.
- Can be used with all 2 and 4 stroke engines.
- Will not separate 2-cycle oil from gasoline.
- E-10 and E-85 ethanol compatible.
- For vacuum (suction side) applications.
- High flow filter head design with 3/8" NPT ports.
- Fits universal style filter heads with 11/16" threads.
- High efficiency 10 micron media filters out 99% of water and 98% of contaminants.
- Clear water collecting bowl extends the life of the filter by allowing water to be drained from the fuel system.
- Water collecting bowl is reusable.

Racor Spin-On Series Marine Fuel Filter Water Separators

- Coated with a durable electrostatically applied powder coating for superior corrosion resistance.
- High efficiency Aquabloc engineered media, which repels water and removes solid contaminants from fuel at 98% efficiency of their micron rating.
- 10 micron (98%@10 micron) - Captures more contaminants than 30 micron elements, and is more effective at stopping water. Extends the life of the entire fuel system.
- The unique spin-on filter design is easy to service and features a reusable clear engineered plastic or metal contaminant collection bowl with a self-venting drain.
- **314465** (490R-RAC-01) comes with hand-operated fuel priming pumps, which allow for easy filter replacement and air purge.

FOR OUTBOARD APPLICATIONS ONLY - WITH CLEAR PLASTIC BOWL
