SKYWinch

- SKYWinch is the opposite of traditional winches and eliminates the hassles and dangers of trailering.
- Simply leave a bow-line attached to your boat and walk it to your trailer without wading in. Then just place rope into SKYWinch, pull tight, and start cranking.
- The Patented wheel grips the rope and easily pulls most lighter-weight boats under 18'.
- The crank arm will not spin backwards until released with trigger for control led payout.
- Accepts ropes to 1/2" diameter and fits most standard trailers with included mounting bracket & hardware.
- For best results, use with 1/2" solid-braid rope with break strength rating that exceeds boat weight.
