Attwood All-Round Articulating Lights - Plug-In

- They focus light at the horizon and above, not in the pilot's eyes.
- The bottom aperture reduces glare at 7.5° below horizontal.
- Above horizontal, the continuous arc of light makes the boat more visible to taller craft.
- The patented Articulating Head adjusts from 15° forward to 15° aft.
- Anti-glare.
- 2 mile, 360° visibility.
- 2-pin locking collar pole.

**Attwood L.E.D. Docking Lights**

- The Attwood product also transmits light in a much broader pattern as opposed to a narrow beam generated by today's competitors.
- At 1.2" thick, the lights are designed to be mounted directly to the surface of the hull.
- Surface mount - only a small hole for wiring and three (3) screws for attachment.
- Allows for fewer hull cuts and minimal intrusion.
- Stainless steel and aluminum components to ensure the product is resistant to corrosion.
- The rubber gasket provided creates a barrier that protects your hull from water entry.
- Packaged per pair.

**Bulb and Socket Ordering Information for Perko 800 Series Solar-Ray® Searchlights**

- Bulbs are not included in lights and must be ordered separately.
- For best results, the bulb and reflector must be perfectly compatible; therefore be sure to specify the stock number of the bulb desired.
- Peak candlepower is exceedingly sensitive to many factors, (i.e. a light source out of focus by 1/32 inch, under-voltage of only 4% or differences between bulb manufactures) which can cause reduction of range of up to 20%.

**Perko XR Series 15" Xenon Searchlights**

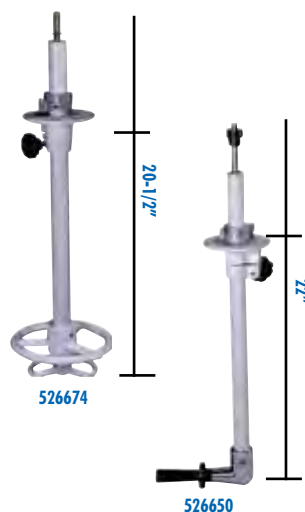

- Designed and manufactured to meet the demanding needs of commercial marine applications.
- The short arc Xenon filled lamps produce an extremely bright and very white light which can be focused in the pilothouse into a narrow long range beam.
- High quality Timkin bearings provide for smooth 380° rotation.
- The XR Series model 9304 searchlight can be operated continuously at 500 watts for a maximum brightness of 35,000,000 candlepower and over 3 mile (IES Handbook) range.
- An iridium coated precision reflector provides for maximum light output and sharp focus.
- The remote control panel controls lamp ignition (start-up) and focus from the pilot house.
- Superior cooling is provided by a heavy duty cooling fan which blows air across the lamp inside the sealed housing.
- Heavy duty marine latches.
- Sealed waterproof construction.
- Heavy rolled marine aluminum housing.
- Safety interlock switch.
- Heavy duty rack and pinion assembly.
- Cast marine aluminum yoke and base.
- Quality ball bearings.
- Nominal drum diameter: 13-3/4".
- 120 VAC.
- NOTE: Lamps are included with complete Searchlights.

**How to Order Searchlights**

- Specify size searchlight, type control, type base, type drum, type finish, type lampholder, and give code word or catalog number.
- Give ordering code and volts of lamp.
- Specify length of control (measured from bottom of base to centerline of lever or upper wheel) if other than the standard dimensions shown on the dimension drawings.
- Specify pedestal height (measured from bottom of base to centerline of drum) if different from the standard 48 inches.
- Example: 12" searchlights, lever control, standard base, vented drum, enamel finish, medium prefocus lampholder, code RECITE-E2. Special length control 22" base to centerline lever.
- To designate the specific lampholder desired add one of the following suffixes to the code word or catalog number:

Medium Screw Lampholder -1 Medium Prefocus Lampholder -2 Mogul Screw Lampholder -3 Mogul Bipost Lampholder -4 2-Pin Prefocus Lampholder -5

The Carlisle & Finch Co. 12" Searchlights - Distant Electric Control (DEC)

- Base is brass.
- Drum, door and yoke, etc., constructed of solid brass.
- Powerful motors in weatherproof base direct the penetrating beam with finger-tip ease from any distance.
- Automatic brakes provide instant start and instant stop with no overtravel.
- Searchlight can be controlled from many separate locations.
- Vented drum (non-vented also available).
- Motors operate on 110-125 volts, 50-60 hz (cycles).
- Rugged joystick switch controls both motions.
- No limit to distance between searchlight and joystick.
- Second, third, fourth, or more joysticks can be added at any time.
- Just five control conductors and a ground conductor required between searchlight and joystick.
- Slip clutches allow manual override at all times, a convenience when relamping.
- Corrosion resistant and oiltight, the joystick can be mounted almost anywhere.
- A small heater on drive unit keeps temperature in base housing above ambient to minimize condensation on and in motors.
- Includes medium prefocus lampholder.
- Bullet lamp not included.
- Includes: 12" electric control.
